Astara Daily Refining Scrub is everything you want in a scrub and nothing that you don't! Real ocean sand is mixed with a blend of raw, "living" botanicals including comfrey, calendula, Hawaiian sea plant extract, chamomile, papaya, linden flower and more to provide a product that removes dead skin cells, cleans pores, soothes and softens while the antioxidants protect damaged skin. Because the product is not heated above 103 degrees Fahrenheit, the botanicals have full potency to give you greater effectiveness and more bang for your buck.
