## TOTALLY TREE

**Astaro Skin Care's** new Blue Flame Purification Skin Care System looked to the trees for its cleansing ingredients. The new lineup features a combination of totara tree essence, tea tree and willow bark, which provides gentle, natural antibacterial protection for your skin. Totara tree essence is a powerful antioxidant; clinical studies show that in low doses, there is an almost thousand-fold reduction of viable bacteria after one hour of contact. For use on combination, oily and blemish-prone skin, this system works in five steps and features four new products, including Blue Flame purifying gel cleanser, purifying toning mist, oil-free moisturizer and purifying treatment gel. Together, these products purify and protect the skin. Spa clients won't just look better, they'll feel better, too, knowing that totara tree essence is obtained from the dead wood of this species, so none were cut down in production.
